

Welcome Home

Energies of 2022

The Year of Miraculous
Liberation

Take the “me” out of the “I” (I am that I am).

It is time for the Ego to experience love on earth, knowing that it’s the vessel with the knowing that he/she is the carrier of the light.

THE DIVINE

The relationship you have with your Higher Self is the most important thing you will accomplish.

Do not let your Mental Body stay inflamed or in control.

You will be caught in the world of illusion.

Balance is necessary for everyone's happiness and heartfelt experiences.

The heart gets tense when its owner is lost in doing.

The heart of our bodies is our love center and naturally regulates the play of light and shadows in our lives.

However, when our left brain gets lost in doing, we are overwhelmed with thoughts of inadequacy, and feelings of not being able to do enough.

The shadows that once surrounded our hearts have shifted into abnormal mass and density, thus causing heart attacks and mental illness in the world today.

The heart must feel things of its own. Hearts cannot feel fulfilled in the doing. It must feel things of its own intrinsic nature.

The heart needs to breathe in love, beauty, and qualities, providing the balance of light and shadows in our bodies and within our lives. This equals **BALANCE**.

Creation begins with an inspired thought, stretches into an idea, and expands to a concept.

When it expands to a concept, you know that it is the divine time to birth.

Everything inspired and creative goes through phases of birthing.

Once you begin to receive spiritual knowledge and understanding, it begins to flow.

Ask and ye shall receive. The shoe represents that. Once you spiritually understand, you will be free to create all that you love.

Nurture the seeds you plant through your heart and soul and you will experience your greatest creations.

You must be the One Who Cares in your world and show others how to bring joy to their lives.

You must touch that which you love and share it with others.

Life is not about struggle, pain, and suffering so that people can reap their rewards in heaven.

Mother Earth is as much God as is heaven. Heaven and Earth are just as real as each other.

Love is wherever you are.

In this art picture the foundation is set.

The Higher Self is guiding your heart, and is using all its spiritual resources to create your life on earth.
